Ruind Wold by Sebastian Huschina

"You are stranded in an unknown world, you cannot remember anything. So your only option is to explore this world and find out what is going on."

1. First Location

You have awoken in a Forest Clearing. Open the Landmark Atlas and find Landmark 1 (Page 1).

"You do not know where you are and without rations or shelter you only option is to Explore the surrounding area"

2. Exploring

When Exploring you have to face Challenges depending on the path you take.

In the Landmark Atlas you see, your only option is exploring the surrounding area, which is part of Zone Deck One [ZD1]-- shuffle it and place it in front of you.

When Exploring you reveal Challenge Cards from the Zone Deck one by one; after each reveal you can stop or reveal another.
All revealed Challenges must be overcome in one turn, so revealing too much can by fatal.

*"You feel an urge to Explore but also do not want to go to far on your first Exploration. So you **Reveal 2 Challenges** ..."*

3. Challenges

Challenges are defined by the available Approaches to overcome them and the corresponding Difficultys and Outcomes for each Approach.

Approaches can be: Fight, Work, Traverse, Climb, Analyse or Feel.

In addtion to that many Challenges also come with Special Effects.

The Wolf, for example, can be Overcome with the Fight or Traverse Approach. Where you have to decide do you want the better Outcome, or the smaller Difficulty.

"As you see the two Challenges you mind automaticly tries to find ways to overcome them ..."

Overcoming Challenges

To Overcome Challenges, you go through the following steps for each Challenge, in the order they were revealed:

1. Choose an Approach to determine the Difficulty.
2. Suffer Exhaustion equal to the Approach and track it for your character.
3. Resolve Outcomes (Details on Page X)
4. Discard the Challenge to the Zone Deck discard pile.

For Example: when you choose to Traverse around the Wolf, you suffer 2 Exhaustion and gain 1 Progress and track both.

"After you overcome your first challenge covered in sweat, you wonder what the Limit is for your body in this World."

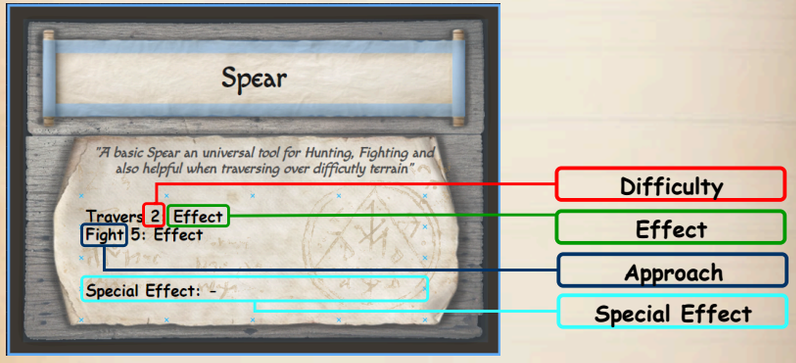

4. Exhaustion Limit

The normal Exhaustion Limit is 20. When your Exhaustion reaches the Limit or above you have to abandon your Exploration and go back to the Landmark you started Exploring from.

"As you think about the consequences of failing, do you see something hanging in a tree. As you get closer you regcognize a Backpack filled with a few tools.
You take out the Tools (Cards) and place them in front of you."

5. Tools

Tools can be used for one or more Approaches and have corresponding Power and Effects for each Approach.
Tool Effects are described on the card or have Keywords (Details on Page X).

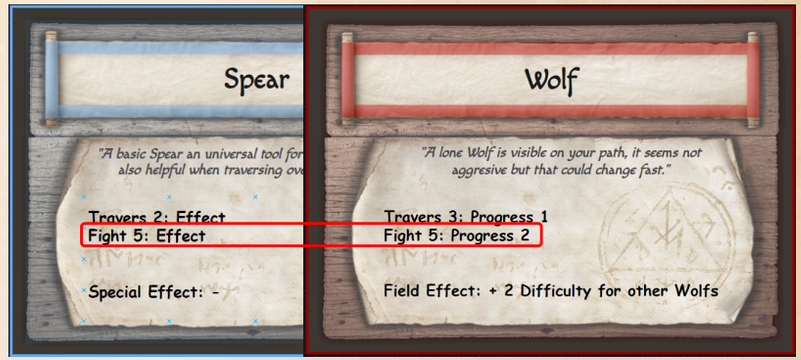

Equipping Tools

Your Backpack can hold many Tools but you can only equip 4 of them. Only Equipped Tools can be actively used.

Using Tools

When choosing an Approach to Overcome a Challenge, you may also choose to use one Tool, which can be used for that Approach.

When using a Tool, you reduce the Approach Difficulty by the Tool Power and resolve Tool Effects.

For Example : when the Spear is used to Fight the Wolf, you would suffer 6 - 5 = 1 Exhaustion, the Spear has no other Effects.

After a Tool Card is used it is discarded.

Be aware you can only use one Tool for all reaveled Challenges. To use another one you have to overcome the currently revealed Challenges first.

Many Tools have Effects that help with overcoming many Challenges at once, like Area, Speed, Range, (see 11. Tool Effect for detailed information).

Maintaining Tools

When Maintaining Tools, you regain all discarded Tools and may swap Equipped Tools with Tools from your Backpack.

At a Landmark you can Maintain Tools for free. During Exploration you may Maintain Tools at a Stop by suffering 5 Exhaustion.

"After you overcome the second challenge you decide to Stop and go over your options. "

6. Stops

A Stop occurs each time you overcome all revealed challenges.

When you reach a Stop you have the following choices:

1. Maintain Tools (regain and swap) by suffering 5 Exhaustion
2. Abandon your Exploration and return to your starting Landmark.
3. Continue Exploring by doing another turn of revealing and overcoming Challenges.
4. Choose a Path to another Landmark
5. Travel to another Landmark when you have the Required Progress.

"You have not yet found, so your options are either going back to the Forest Clearing or continuing Exploring.

*After a while **you decide** that you ...*

*Abandon your Exploration **[Read section 7. Landmarks]** or*
*Continue Exploration **[Continue Exploring as before]**."*

7. Landmarks

When you reach a Landmark all **Progress is resets to 0** and you resolve all arrival effects for the Landmark.

Afterwards you have the following Options:

1. Maintain Tools (regain and swap) for free
2. Rest
3. Choose a Path to Travel to other Landmarks
4. Additional Options for the specific Landmark

"Now that you have reached a Landmark again, you should Rest, before you decide what path to take next."

8. Rest

When you Rest you recover from Exhaustion. How much you can recover depends on many Factors, like the Landmark you are at, do you have Rations or Shelter.

The Base Rest Value is defined by the Landmark, modifiers are found on Cards.

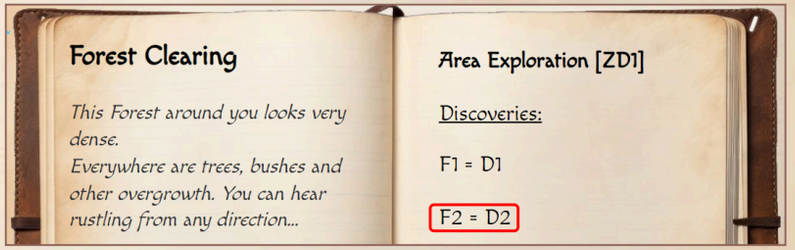

"After Resting it is time to Explore again and hopefully Disccver something."

9. Findings and Disocveries

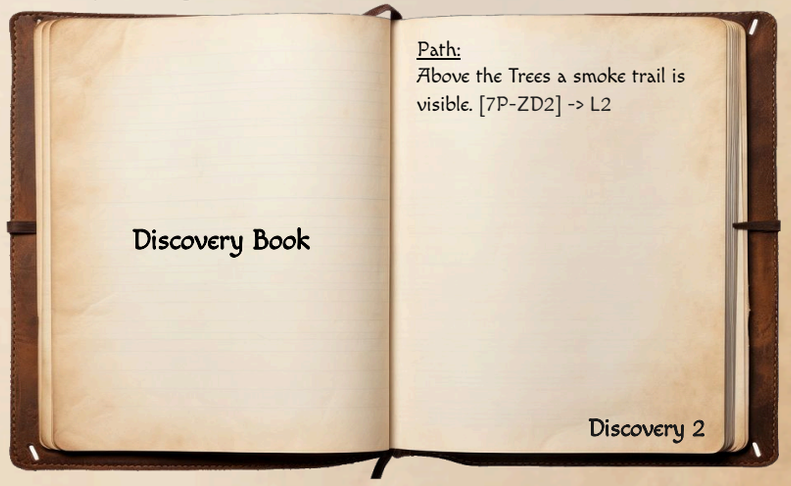

To Discover something you need first to Find something on a Challenge Card.
Findings are Outcomes for specific Approaches when Overcoming Challenges.

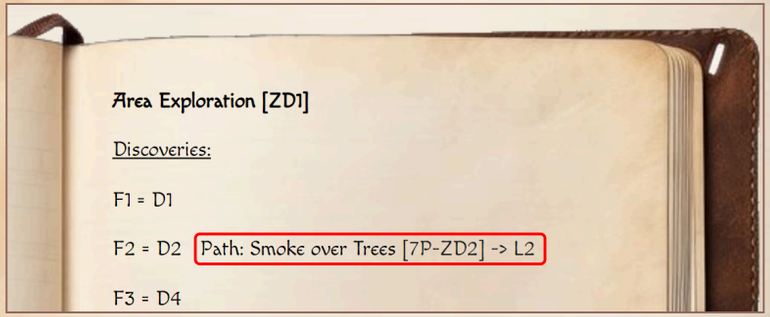

A Finding leads you to a Discovery on the current Landmark Page.

For example the Finding F2 leads you to Discovery D2, which is found in the Discovery Book Page 2.

All Discoverys are noted on the current Landmark Page so that you can use this knowledge for furture Explorations.

"Now that a Path to another Landmark is Found, you can choose to follow it"

10. Choose a Path

When at a Landmark or a Stop you can Choose a Path to any other Landmark you can reach from the current Landmark. In both cases you set your Progress to 0.

When you Choose a Path, you note the Required Progress for your Chosen Path. Then take out the corresponding Zone Deck and shuffle it. You do this even when the Deck was used before.

For example Path: Smoke over the Trees [7P-ZD2] -> L2 means:

- The Required Progress is 7.
- You take out Zone Deck 2 and shuffle it.
- This Path leads to Landmark 2 (Landmark Atlas Page 2).

When you do an Area Exploration, you do not have Required Progress but you will still gain Progress. When you then Choose a Path at a Stop, you can use this Progress for the newly Set Path.

"After some thinking you have decided to follow the newly Discovered Path, and see what awaits you at the end of it"

11. Travel

When you have Chosen a Path to another Landmark, reached the Required Progress and are at a Stop, you may Travel to that Landmark.
To do so open the Landmark Atlas Page for that Landmark.

When you arrive don't forget to reset your Progress to zero and Resolve arrival Effects.

10. Effect Activations

The following Keywords are combined with Effects to define there Actication.

Approach: Effect (Fight, Work, Traverse, Climp, Analyse, Feel)
Challanges and Tools can have effects that only activate when you choose the specific Approach.

Revealed
This effect activates only once, when this Challenge is revealed.

While Revealed
This effect is active as long as the Challenge is revealed.

Last Challenge
This effect only activates when there is only one revealed Challenge left.

On Use
This effects activate when a tool card is used.

Close
This effect can only activate for the first Challenge in Reveal Order.

Range X-Y
This effect can activate for Challenges in Position X through Y in Reveal Order.

Charging
Only activates after the first player Action, after revealing Challenges.

Grouping [Challenge]
Only activates when there is at least one other card with the same Name revealed.

11. Universal Effects

Progress X
You gain X Progress, requred for Travel.

Find FX
You find a Discovery. (see 9. Findings and Discoveries)

Reveal X
You reveal X cards from the Zone Deck, which you need to overcome befor you reach a Stop.

Exhaust X
Gain X Exhaustion, for your Character.

Recover X
Remove X Exhaustion, from your Character.

Area X [Tool]
You can use the Tool against X adjacent Challenges with one shared Approach.

Overflow [Tool]
Power exceeding the targeted Challenge's Difficulty carries over to the next challenge in sequence, reducing its Difficulty by the remaining amount.

Speed X [Tool]
This tool may be used X times before it is discarded at the next Stop.
Track by placing a marker ont the Card each time used.

Scout X
Look at the top X cards of the Zone Deck. Put them back in the same order.
